Chief Manager - IT (Database Administrator) Scale - SMGS-IV No. of Vacancies - 02	28-40	Minimum 60% Marks in B.E./ B. Tech in Computer Science/ Information Technology/ Electronics/ Electrical & Electronics/ Electronics & Communication OR MCA / M. Sc. (Computer science/ IT) (# Institute should be recognized/ approved by Government bodies/ AICTE)	•Fine tune the system, Manage roles and Privileges. •Analyze all the needed data warehouse activities and identify what essential resources they require. •Strong problem solving and troubleshooting skills with the ability to exercise mature judgment •Ability to work independently, manage small engagements or parts of large engagements.	Mandatory Certifications at the time of application: Oracle certified Associate and / or Oracle Certified professional Preferred additional certifications (not mandatory): TOGAF/ PMP /ITIL Intermediate or higher level Certification	•With Bachelor's Degree: Minimum total Experience in IT/BFSI- Minimum 7 years in which 5 years' experience in data base, data modelling and Exadata Platform. •With Master's Degree: Minimum 5 years in which 3 years' experience in data base, data modelling and Exadata Platform.	•Prepare a design for all metadata relating to various Extract/ Transform/ Load {ETL} processes Create both logical and physical data models. •Design Data warehouse, Data Models, OLAP system, Experience in Oracle PL/SQL. •Replication and high-availability solutions (Data Guard, AlwaysOn, Clustering, Replication/Mirroring)

Name of the Post	Age	Educational Qualifications	Roles & Responsibilities	Other Preferred Qualifications / Certifications	Work Experience	Specific / Preferred Skill
Chief Manager - IT (Network) Scale - SMGS-IV No. of Vacancies – 02	28-40	Minimum 60% Marks in B.E./ B. Tech in Computer Science/ Information Technology/ Electronics/ Electrical & Electronics/ Electronics & Communication OR MCA / M. Sc. (Computer science/ IT) (# Institute should be recognized/ approved by Government bodies/ AICTE)	•Ability to design and implement network solutions that meet business requirements. •Proficiency in diagnosing and resolving network issues efficiently. •Strong problem-solving skills and the ability to think analytically. •Review and update network policies, standard operating procedures and documentation	Mandatory Certifications at the time of application: Cisco Expert/Architect Certification Preferred additional certifications (not mandatory): Juniper Check Point Certified Security Administrator Fortinet Certified McAfee Security Specialist TOGAF/ PMP /ITIL Intermediate or higher level Certification	•With Bachelor's Degree: Minimum 7 years of post-basic qualification experience in IT, of which minimum 5 years' experience Networking Domain. •With Master's Degree: Minimum 5 years of post-basic qualification experience in IT, of which minimum 3 years' experience Networking Domain.	Desirable Core Technical Skills •Understanding of network security principles and practices, including firewalls, VPNs, and intrusion detection systems •Strong understanding of network protocols, services, and standards (e.g., TCP/IP, DNS, DHCP). •Coordinate with telecom service providers, OEMs and vendors for network provisioning, implementation and support. •Collaborate with application, security and data center teams to ensure seamless integration and service delivery.

Name of the Post	Age	Educational Qualifications	Roles & Responsibilities	Other Preferred Qualifications / Certifications	Work Experience	Specific / Preferred Skill
Chief Manager - IT (Infra) Scale - SMGS-IV No. of Vacancies - 02	28-40	Minimum 60% Marks in B.E./ B. Tech/ B Sc in Computer Science/ Information Technology/ Electronics/ Electrical & Electronics/ Electronics & Communication. OR MCA / M. Sc. (Computer science/ IT)/ M.Tech in Computer Science/ Information Technology/ Electronics/ Electrical & Electronics/ Electronics & Communication (# Institute should be recognized/ approved by Government bodies/ AICTE)	•Developing and integrating solutions in cooperation with Infrastructure and Application project teams for solid infrastructure automation using existing industry standards, best practices and know-hows fitting it into existing infrastructure and operations framework. •Design, Plan & Execute projects using various technology solutions. •Monitoring LUN utilization and assist in capacity planning, storage systems and clusters •Manage logs, backups and tape inventory. • Escalating hardware and system-level problems to AMC Partners. • Hardening of servers as per bank policy • User administration, User access & activity review. • Infrastructure Capacity review & planning	Mandatory Certifications at the time of application: CompTIA (Compulsory for Server+ and Any one from ITF+, A+, Network +, Cloud +) Preferred additional certifications (not mandatory): • CCNA/ RHCA/ MCSA • TOGAF/ ITIL Intermediate or higher level Certification.	•With Bachelor's Degree: Minimum 7 years post basic qualification Experience in IT Industry/ BFSI or IT Vertical of an Organization as Infra Administrator •With Master's Degree: Minimum 5 years post basic qualification Experience in IT Industry/ BFSI or IT Vertical of an Organization as Infra Administrator	Desirable Core Technical Skills •Oversee the planning, deployment and maintenance of the Bank's IT infrastructure including servers, storage, network, data centre & DR infrastructure. •Ensure availability and high uptime of core IT infrastructure to support business applications and operations. •Manage Data Center and DR site operations and coordinate for infra capacity planning and performance optimization. •Plan and implement upgrades, patches, and preventive maintenance activities for servers and infrastructure components. •Coordinate with vendors/OEMs for procurement, installation and support of infrastructure hardware and software.

			•Performance improvement and automation of jobs •Above activities in all environments of application (production, DR, development and staging)			•Lead incident/problem management related to infrastructure and perform root cause analysis to prevent recurrence. •Ensure regular backup, replication and DR drills are conducted as per bank's policy. •Provide technical guidance to infrastructure team members and coordinate with other IT verticals (network/security/application teams).

Senior Manager – IT (Database) Scale - MMGS-III No. of Vacancies - 01	28-37	Minimum 60% marks in : B.E./B.Tech/B.Sc. or MCA/M.Sc./M.Tech in Computer Science/Information Technology/Electronics/Electrical & Electronics/Electronics & Communication (# Institute should be recognized/approved by Government bodies/AICTE)	Design, implement, and manage database systems to ensure high availability, performance, and security for banking applications. Lead efforts to optimize database performance, manage roles, privileges, and data models, including data warehouses and OLAP systems. Collaborate with application and infrastructure teams to integrate databases with banking systems and ensure seamless data flow. Develop and maintain metadata designs for ETL processes and create logical/physical data models to support business requirements. Ensure compliance with BFSI regulatory standards (e.g., RBI guidelines, GDPR) and support disaster recovery (DR) and business continuity planning (BCP).	Mandatory Certifications at the time of application: Oracle Certified Associate or Oracle Certified Professional (preferably on Oracle 12c/18c). Preferred additional certifications (not mandatory): ITIL Foundation Certificate, Certified Scrum Master (CSM), Microsoft Certified: Azure Database Administrator Associate, AWS Certified Database – Specialty.	With Bachelor's Degree: Minimum 7 years in which 5 years of hands-on experience in database administration, with at least 3 years managing large-scale databases in the BFSI or IT sector. With Master's Degree: Minimum 5 years in which 3 years of hands-on experience in database administration, with at least 2 years managing large-scale databases.	Experience with high-availability solutions (e.g., Oracle RAC, Data Guard, SQL Server AlwaysOn). Knowledge of cloud-based database solutions (e.g., AWS RDS, Azure SQL Database) and containerization (e.g., Docker, Kubernetes). Strong analytical and troubleshooting skills for database performance optimization and compliance with BFSI standards. Expertise in database platforms (e.g., Oracle, SQL Server, PostgreSQL) and tools like Oracle PL/SQL. Proficiency in data modeling, data warehousing, and ETL processes.

Senior Manager - Fintech Officer Scale - MMGS-III No. of Vacancies – 02	28-37	Mandatory: B.Tech/ MCA Minimum 60% marks in the applicable qualification.	Responsible for coding, testing and debugging applications to ensure smooth and secure functioning. Collaborate with UX designers to create a seamless user experience, integrating features such as mobile banking, lending, budgeting and payment gateways. Responsible for API Integration, identification of add ons Fintech services for future requirements. Create algorithms, Research, analyze and forecast market trends to make modeling decisions	Minimum post basic qualifications experience of 5 years in IT Industry/ BFSI or IT Vertical of an Organization, out of which minimum 3 years should be in Fintech in BFSI sector preferably working experience in Digital Banking platform.	* Strong problem solving and troubleshooting skills with the ability to exercise mature judgment. * Ability to work independently, manage small engagements or parts of large engagements.

Name of the Post	Age	Educational Qualifications	Roles & Responsibilities	Work Experience	Specific / Preferred Skill
Senior Manager - Data Quality Developer Scale - MMGS-III No. of Vacancies – 01	28-37	Mandatory: B.Tech/ MCA Minimum 60% marks in the applicable qualification.	Responsible for designing, developing, testing, deploying and documenting a project's data quality procedures and its outputs. Creating new Data Quality rules as per the business requirement and deploy to the existing systems. Provide Data Quality Scorecards, Dash-Boards and Ad-Hoc reporting. Perform data load and mappings from source systems as the scope of quality information increase across the enterprise. Responsible for standards when creating mapplets and code migration from development through test. New API connections.	Minimum post basic qualifications experience of 5 years of hands on post basic qualifications experience in managing large Data Quality Programme in BFSI domain.	* Strong problem solving and troubleshooting skills with the ability to exercise mature judgment. * Ability to work independently, manage small engagements or parts of large engagements.

Name of the Post	Age	Educational Qualifications	Roles & Responsibilities	Work Experience	Specific / Preferred Skill
Senior Manager- SAS Viya Administrator Scale - MMGS-III No. of Vacancies – 01	28-37	Mandatory: B.Tech/ MCA Minimum 60% marks in the applicable qualification.	Monitor, log and troubleshoot a SAS Viya environment. Manage identities and users. Manage content and functionality. Working on all of the day-to-day tasks associated with the Statistical Analysis System software, including knowing how to set-up, configure and install the software on a server. Perform all core inSync activities such as configuring, managing and monitoring in Sync.	Minimum post basic qualifications experience of 5 years in IT Industry/ BFSI or IT Vertical of an Organization, out of which minimum 3 year should be in SAS	* Strong problem solving and troubleshooting skills with the ability to exercise mature judgment. * Ability to work independently, manage small engagements or parts of large engagements.

Name of the Post	Age	Educational Qualifications	Roles & Responsibilities	Work Experience	Specific / Preferred Skill
Senior Manager - Nosql Database Administrator Scale - MMGS-III No. of Vacancies – 01	28-37	Mandatory: B.Tech/ MCA Minimum 60% marks in the applicable qualification.	Develop and implement data models, schemas and structures to support efficient data storage and retrieval. Ensure database security by implementing appropriate access controls and encryption protocols.	Minimum post basic qualifications experience of 5 years in IT Industry/ BFSI or IT Vertical of an Organization. Out of which minimum 3 years should be in any public sector Bank/ Private Sector Bank/ NBFCs.	* Strong problem solving and troubleshooting skills with the ability to exercise mature judgment. * Ability to work independently, manage small engagements or parts of large engagements.

Name of the Post	Age	Educational Qualifications	Roles & Responsibilities	Work Experience	Specific / Preferred Skill
Senior Manager - Gen AI Developer Scale - MMGS-III No. of Vacancies – 01	28-37	Mandatory: B.Tech/ MCA Minimum 60% marks in the applicable qualification from above.	Review data, refine algorithms and train models to improve accuracy. Answer business challenges using AI software. Design, develop, implement and monitor AI systems. Explain AI systems to top management and stakeholders. Develop data ingest and data transformation architecture. Troubleshoot and resolve issues related to generative AI models and implementations. Create and maintain documentation for generative AI models and their applications	Minimum experience of 5 years in the Banking or Financial Services, out of which minimum 3 years should be in AI preferably on Banking Projects	Desirable: * Strong problem solving and troubleshooting skills with the ability to exercise mature judgement. * Ability to work independently, manage small engagements or parts of large engagements
